Education

İzmir University of Economics **İzmir, Türkiye**
Bachelor of Science in Computer Engineering; GPA: 3.09 *Aug. 2023 – Aug. 2027*

Experience

Arkas Holding - Bimar **July 2026 – Aug. 2026**
.NET / React Developer Intern

- Description: Developed a Port Ship Tracking System, an end-to-end internal application for managing ships, ports, cargoes, crew members, and port visit records.
- Responsibilities: Built a RESTful Web API with ASP.NET Core and Entity Framework Core following a layered Repository/Service architecture, and documented endpoints with Swagger. Developed the frontend with React (Vite), consuming the API via Axios and implementing form validation for data entry screens. Designed a relational SQL Server database schema (6 related tables with foreign key constraints) and maintained source control through an Azure DevOps Git repository.

Invicti **Jan. 2026 – June 2026**
Technical Documentation Intern

- Description: Contributed to the Technical Documentation team at a global cybersecurity leader, focusing on modernizing documentation workflows and enhancing user self-service tools.
- Responsibilities: Developed and maintained technical content using Docusaurus and Markdown, managed version control via GitHub/GitLab, and actively participated in the Chatbot integration project to streamline documentation accessibility.

İzmir University of Economics Promotion Unit **June 2025 – Aug. 2025**
Student Assistant

- Assisted in promoting and introducing the university to prospective students and their families.

İzmir University of Economics Directorate of Health, Culture and Sports **Sep. 2025**
Orientation Guide

- Worked at the orientation week for prep and freshman students.

Projects

Java API Gateway & IPS **Jan. 2026 – May 2026**
Spring Boot, PostgreSQL, OOP, File I/O, Cybersecurity Logic

- Description: A scalable, production-ready middleware system designed to monitor network traffic, detect security threats, and manage data persistence through a relational database.
- Responsibilities: Developed a dynamic threat detection engine using Spring Boot to identify malicious patterns and implement a "3-strike" automated IP blacklisting algorithm. Integrated PostgreSQL via Spring Data JPA for persistent storage of security logs and incident records, transitioning from a local file-based system.

ÖSYM Exam Scraper **Aug. 2025 – Sep. 2025**
Python, Selenium, Web Scraping

- Description: An automated web scraping tool that extracts student exam results from the Turkish university entrance exam system (ÖSYM) and transfers data to Excel spreadsheets for batch processing.
- Responsibilities: Developed a Python automation script using Selenium WebDriver to scrape results from a government website. Implemented Excel integration with openpyxl for data organization and analysis.

Game Catalog Management System **Mar. 2025 – May 2025**
Java, OOP, JavaFX Framework

- Description: A desktop application for managing and organizing video game collections with filtering, sorting, and data import/export capabilities through an interactive GUI.

Skills & Interests

- **Languages:** English (C2 - Full professional proficiency), Turkish (Native)
- **Interests:** Fullstack Web Development, Data Science, AI
- **Coding:** Java, C#, Python, C, JavaScript, Assembly, C++
- **Technologies:** SQL, MySQL, PostgreSQL, Spring Boot, ASP.NET Core, Entity Framework Core, React, Axios, Swagger, Azure DevOps, HTML, CSS, NPM, Tailwind CSS, Selenium, Pandas, JavaFX, GitHub, GitLab, Jira, Trello
